

## **RELOCATABLE PROCESSING PLANT FOR EXTRACTING JUICE FROM CITRUS FRUIT AND ASSOCIATED METHODS**

### **Abstract Of The Disclosure**

- 5 A relocatable plant for citrus juice extraction includes several trailers which are connected together on site to form the relocatable plant. The plant includes a fruit handling trailer, a juicing trailer, a chilling trailer, a tank trailer, a generator trailer, a detachable walkway platform interconnecting the trailers and a plurality of entryways along the walkways for allowing ingress and
- 10 egress of personnel. A method aspect of the invention includes obtaining fresh citrus juice on a commercial scale by stationing the relocatable plant on site at a citrus grove having fruit ready for harvest, and processing citrus fruit through the plant at a rate sufficient to produce at least 500 gallons of juice per hour of operation.
